

What's hindering teamwork?

With different roles, responsibilities and remote workers, teamwork is vital to the success of an organisation. Below are some of the different challenges that businesses face, sound familiar?

If so, Microsoft Teams could help you work better together.

1 Everyone has a different favourite app. Some like instant messaging, some prefer emails. Employees are most productive when they can choose how they work.

2 Unsupported apps are complicating collaboration. If you don't provide the right one, they'll bring their own.

3 Open spaces aren't encouraging teamwork. Employees still need meeting rooms and private areas. They need space to retreat, think, and recharge.

4 People work in many different teams. Everyone's job is different. It can be a challenge to find a priority they all have in common.

5 Virtual teams can't keep in touch. Employees need a centralised way to collaborate. Otherwise it's easy to fall out of the loop.

6 Traditional management is slowing things down. It should be quick and easy to make decisions. Complicated structures can get in the way.

Choose a complete collaboration solution

Meet Microsoft Teams, the hub for teamwork in Office 365. It's a fluid and open environment for all team members. [Read our e-book](#) to find out how your employees can work better together with Microsoft Teams.
